# ***Evaluations;***

*The evaluation committee appreciates your feedback for games played this 2007 season. I hope you will find this form helpful in your process. A few things to inform you about the form are listed below. Also attached is a sample form filled out by an evaluator that was watching the game from the stands.*

**Name:** name of official in position [if known]

**Time:** an off field evaluator would fill in the time the crew arrived on the field. The on field evaluator would mark what time the official arrived at game sight.

**Pre game administration:** to an off field evaluator this would mean what the crew does from the time it enters the field until kickoff. For an evaluation done by crew member this would also include a pre game and participation in the dressing room prior to taking the field.

**Appearance:** neatly properly dressed with proper equipment. An official with dirty worn socks and no device to keep track of downs would have two "strikes" against him and could not be rated better than poor.

**Physical condition:** an official must be physically capable of performing his duties. An official who consistently "walks" on the field should expect a grade of poor.

**NFHS signals:** official is using signals as outlined in the officials manuals. This official should not be adding signals used in the NFL.

**Crew communication and signals:** this is to grade whether or not an official is using the signals vital for crew communication. Signals such as count signal, thrust signals for "off the line" and backward pass, double stakes and any other signals deemed necessary.

**NFHS mechanics:** two different categories. One is regular play mechanics during runs and passes. The other one would be for free kicks, scrimmage kicks, try and field goal situations.

**Hustle:** simply stated, does this official keep play moving? Does he move quickly? Does he have the stamina for four quarters? Is he always in position? [grade accordingly]

**Rule interpretation and judgment:** does the official use good judgment? Does he call out of "his pond"? does he call fouls away or with no impact on the play? Does the official use preventive officiating practices?

**Field presence:** does the official present himself well to players, coaches, other officials and spectators? Does he control his sidelines and maintain clear sidelines for two yards? Does he control time out conferences in his area? Does this wing official move up and down his sidelines or just stand at the line of scrimmage? Does he work well with his chain crew or ball person?

*This committee needs your input and welcomes as much as possible. Your directors hope to track the progress of new officials and aid in their educational process. This committee will be working hand in hand with the recommendations committee when it is time for their assembling of play off crews. We hope to get everyone involved and help make the MFOA the best it can be.*

Both wing officials are slow getting downfield.  
 L.J. had no down indicator, Linesman doesn't count every play.  
 Head coach was ejected 4th quarter by MR. Gibbs.  
 Crew works well together, very good signals by B.J.
